

Jetpack.

This was hard to select and get going. For those interested read the story below, I tried a lot of variants to get one that works.

This is a simple jetpack. It has a simple sound when running. No visual effects.

1. **Install.** This one is in the downloads "Jetpack addon". All the files you need are in a dod folder.
2. **You will need to bind a key,** bind "+jetpack" to a key, e.g., bind "MOUSE4" "+jetpack"
3. **To configure:** Settings are in **dod\cfg\sourcemod\plugin.jetpack.cfg**
 - I have this selected as **off**, **sm_jetpack "0"** set to "1" for on all the time.
 - Speed is **sm_jetpack_speed "120"** faster than the default of "80"
 - Volume is higher **sm_jetpack_volume "0.2"** than the default of "0.1"
4. **To use:** *There is a slight bug, you may find you stick to the ground. Read below.*
 - If you find you are stuck to the ground or only "skating" across it, simply look up or jump then press the bind.
 - Turn on or off via the custom admin menu.
 - To turn on for specific maps via the Extended Map Configs plugin. Put in **sm_jetpack "1"**
 - Press the bind you made. Fly... when dropping fast, press just before landing, no damage.

About the selection of a jetpack plugin.

Lots on the newer and updated SourceMod plugins don't work for Day of Defeat:Source, at least not on a listen server with RCBot2. However, "back in the day" (2007) I used one, it was simple and made by Knagg0 version 1.1.0. <https://forums.alliedmods.net/showthread.php?t=56374>

There are many versions of it to add different sounds, admin access only, fuel gauge **but they have problems.**

The two jetpack plugins that "work".

Page 1. Post 1 by Knagg0. The original in 2007. No frills, just bind "+jetpack" to a key (**not +sm_jetpack as it says.**) <https://forums.alliedmods.net/showpost.php?p=488779&postcount=1>

Page 11 Post 104 by GEN3RIC. **Has a sound issue but worked.** Same as above added sparks trail and also a command to turn them on and off - sm_jetpack_show_visuals (default "1" = on)

<https://forums.alliedmods.net/showpost.php?p=1044519&postcount=104>

It was made for Left for dead and I couldn't get the sound working.

Past those two variants for dod:s... you run into all sorts of major problems.

Post 109 – not working and stalls on map load, **Post 128** - Crash, **Post 128** – Crash, **Post 171** – Crash.

Now there are others like **[ANY?] JetPack (v1.4.1 - 18/11/18)** that... sort of worked and even has a 2022 version.

Most of commands for admin didn't work and you need to leave the bind settings on the default and duck keys...problem is ... bots use that all the time, it's actually fun but eventually the bots die from constantly falling from the sky. <https://forums.alliedmods.net/showthread.php?t=310100>
